## REPORTING AND USE OF GAAP AND NON-GAAP MEASURES

The company believes that the non-GAAP financial measures presented in this news release are useful to investors as they supplement investors' understanding of underlying business trends, comparability across periods and provide the ability to measure the company's operating performance. Management used these non-GAAP financial measures during the periods presented to assess the company's performance, to make decisions about how to allocate resources and to develop expectations for future operating performance. The company provides certain financial information on a constant currency basis. The effect from foreign currency, calculated on a constant currency basis, is determined by applying current period exchange rates to prior year results and is net of the year-over-year impact from hedging. The per diluted share effect from foreign currency is calculated using a $35 \%$ tax rate. In addition, the company provides comparable sales which is defined as the aggregate of: (1) year-over-year sales for stores that have been open as the same brand at least one year and whose square footage has not been expanded or reduced by more than $20 \%$ within the past year, with prior year's net sales converted at the current year's foreign currency exchange rate to remove the impact of currency fluctuation, and (2) year-over-year direct-to-consumer sales with prior year's net sales converted at the current year's foreign currency exchange rate to remove the impact of currency fluctuation. Non-GAAP financial measures should be used supplemental to, not as an alternative to, the company's GAAP financial results, and may not be the same as similar measures presented by other companies.

## Abercrombie \& Fitch Co. Store Count Activity

Thirteen Weeks Ended April 29, 2017

|  | Abercrombie ${ }^{(1)(2)}$ |  | Hollister ${ }^{(3)}$ |  | Total |  |
